EDUCATION

Universidad Politécnica Salesiana (UPS)
B.S. in Computer Science Engineering
Aug 2018 – Feb 2025

Universidad Estatal de Milagro (UNEMI)
Language Pedagogy (English)
Aug 2021 – Aug 2025

Colegio Técnico Vida Nueva
Technical Baccalaureate in Information Technology
Sep 2009 – Jun 2016

EXPERIENCE

Handytec — Data Engineer
November 2025 – Present

Implementation of data solutions on Microsoft Fabric and Databricks, including Lakehouses, notebooks, and ETL/ELT pipelines with PySpark, Dataflows, and Python. Design of architectures under the Medallion pattern and data integration from APIs and transactional systems. Application of data governance (lineage, catalog, quality). Building Data Marts for analytics and reporting. Administration of Azure, Fabric, Databricks, and AWS infrastructure, working with business and analytics teams to enable data-driven solutions.

Corporación TuringTech — Solutions Architect & Tech Lead
January 2025 – Present

Architectural design and cloud deployment of custom solutions (BI, AI, and Data Engineering), defining the technology stack and architectural patterns (Microservices, Serverless) while leading a technical team of 4 to ensure scalability, security, and operational cost optimization.

Gestcobra Cía. Ltda. — Data Engineer
March 2024 – November 2025

Design of enterprise data architecture under the Medallion pattern, ensuring standardization and traceability. Development of ETL/ELT pipelines in Python for integration of transactional data and financial APIs. Implementation of governance frameworks (lineage, catalog, quality, and versioning). Management of AWS infrastructure (S3, EC2, IAM) and intelligent automation to optimize collections KPIs. Building Data Marts and advanced reports in Power BI.

Office of the Attorney General of Ecuador — Database Administrator
August 2023 – February 2024

Administration and optimization of institutional databases, ensuring high availability and consistency. Implementation of backup, recovery, and business continuity strategies (RPO/RTO). Automation of data management processes, structured migrations, and document digitization. Standardization of technical procedures and support documentation.

Fisa Group — Data Engineer & BI Developer
January 2022 – July 2023

Orchestration of ETL pipelines and data load optimization. Design of models and procedures in SQL Server and PL/SQL. Implementation of data quality controls in critical processes. Creation of executive dashboards with RShiny and development of Data Marts for financial and operational areas.

SKILLS

Python · SQL · PySpark · Apache Spark · Apache Flink · Kafka · Delta Lake · ETL / ELT · AWS · Azure · S3 · Databricks · Data Factory · Apache Airflow · Grafana · SSIS · Data Lakehouse · Data Warehouse · Data Mesh · Data Fabric · CI/CD · Backend Development · Git · Docker

LANGUAGES

Spanish

English

CERTIFICATIONS

Cloud Architecture & Data Engineering

Microsoft Certified: Fabric Data Engineer Associate (DP-700) — Microsoft, 09.2026

Fabric Data Engineer Bootcamp — 03.2026

AWS Certified Solutions Architect – Professional — Amazon Web Services, 08.2025

AWS Certified Solutions Architect – Associate — Amazon Web Services, 05.2025

Data Lakehouse & Databricks Ecosystem

Agent Fundamentals — Databricks, 07.2026

Generative AI Fundamentals — Databricks, 07.2026

Databricks Fundamentals — Databricks, 07.2026

AI Practitioner Certificate — 04.2026

Generative AI & LLMs

Claude Code in Action — Anthropic Education, 03.2026

Model Context Protocol — Anthropic Education, 02.2026

Google Cloud AI Essentials: Gemini — Google Cloud, 09.2025
